Encontro de Formação
da Ordem dos
Médicos Veterinários

15 de abril // domingo

Animais de Produção - Pequenos Ruminantes/ Suínos // sala 3

09h00-09h50

Practical application of thoracic ultrasonography in small ruminants / Phillip Scott

Using high quality video recordings of trans-thoracic ultrasound examination of all the common respiratory diseases and pleural pathologies, this talk will enable delegates to scan a sheep's chest within two minutes and interpret their clinical findings.

09h55-10h45

Practical application of abdominal ultrasonography in small ruminants / Phillip Scott

Using high quality video recordings of trans-abdominal ultrasound examinations, this talk will enable delegates to scan the bladder, right kidney, liver, and intestines, each organ system within two minutes and interpret their clinical findings.

12h10-13h00

The diagnosis and treatment of neurological conditions of small ruminants / Phillip Scott

Accurate diagnosis and treatment of nervous diseases is best achieved by localising the lesion within the central nervous and then investigating its nature, whether infectious, toxic, or metabolic. Cerebrospinal fluid analysis is integral to this logical approach.
